SUMMARY

Java Backend Developer with 3.8+ years of experience building scalable microservices using Java, Spring Boot, REST APIs, and SQL/NoSQL databases. Experienced in designing high-performance backend applications across the full SDLC.

EDUCATION

BIRLA INSTITUTE OF TECHNOLOGY MESRA, RANCHI — **BTECH**

2018 – 2022 | CGPA: 8.4/10

TECHNICAL SKILLS

Languages: Java 8+ (Streams, Lambdas, Functional Interfaces), Python, C++, J2EE

Frameworks & Databases: Spring Boot, REST APIs, Spring MVC, Spring Data JPA, Spring Security, JWT Authentication, Microservices, MySQL, MongoDB (NoSQL), Indexing, Query Optimization, React

Messaging & APIs: Kafka, Event-Driven Architecture, RESTful Services, Inter-service Communication (REST, Async Messaging)

Cloud & DevOps: AWS, Docker, Kubernetes, CI/CD, Git, OpenAI APIs, GitHub Copilot, Prompt Engineering

Testing & Quality: JUnit5, Mockito, Integration Testing, Code Reviews, Debugging, Refactoring, Agile/Scrum

Scalability & Monitoring: Multithreading, Concurrency, Performance Optimization, Grafana

Concepts: OOPs, Data Structures & Algorithms, Design Patterns, Exception Handling, OS, DBMS, Problem Solving

PROFESSIONAL EXPERIENCE

Experienced Software Developer | Amdocs, Gurugram | Jul 2024 – Present

- Built and maintained **Java 8+ Spring Boot-based microservices** for **BillKey**, improving billing accuracy and enabling real-time billing for **100k+** users.
- Designed and implemented secure **REST APIs with JWT authentication** for “BANANA” module to enable manual barring and un-barring of customer accounts, implementing new features and optimizing existing ones to improve **system performance by 30%**, reducing **server downtime by 15%** and ensure long-term maintainability.
- Worked with **Apache Kafka** and AWS services for asynchronous event-driven processing, cloud deployment, and application management.
- Optimized **MySQL and MongoDB with indexing**, reducing **API latency** and improving invoice processing time.
- Applied **Spring Data JPA, Multithreading, Concurrency, and Design Patterns** to improve performance.
- Developed scalable backend solutions following **microservices architecture** and industry-standard coding practices.

Software Developer | Amdocs, Pune | Jul 2022 – Jul 2024

- Designed and developed “**WALL-D**”, a Java-based internal tool to identify data mismatches across enterprise systems using **JDBC and SQL** — reduced manual analysis effort by **~60%**.
- Resolved **production issues**, optimized database queries, automated recurring tasks, and improved long-running jobs.
- Wrote **JUnit5 & Mockito** tests, cutting post-release issues and saving **100+ debugging hours**.
- Performed code reviews, debugging, refactoring, and **CI/CD deployments** using **Jenkins, GitHub Actions**, along with monitoring and performance profiling through Grafana.
- Enhanced system stability through **DB optimization, JVM tuning**, scalability improvements, and Agile practices.

Software Developer Intern | Car Dekho Gurugram | Jan 2022 – Jul 2022

- Developed a **MERN-based** car management system with CRUD operations, **authentication**, and **REST APIs**.
 - Built and optimized backend APIs using Node.js, Express.js, and MongoDB, improving website performance and reducing latency.
-

PROJECTS

OfficeHub – Office Management System (Java, Spring Boot, MySQL, JPA)

- Built a 3-tier office management platform** using Spring Boot REST APIs to support user registration operations.
 - Designed normalized **database schema**, indexing, and optimized queries for faster performance.
 - Streamline entity management, enable role-based access control, and reduce **boilerplate code**.
-

ACHIEVEMENTS

- Scored 225 marks with a percentile of 99.44% in JEE Mains.
- 4 star ranking on Code Chef, Solved 250+ DSA Problem on LeetCode.
- Awarded for Automation Initiative at Amdocs for improving system efficiency.
